Noz. 43 and 44 Holmden Farm, the Twin wells the depot and a number of cars of the Oil Creek and Pennsylvania Railroads, all narrowly escaped burning.

The office of Kelly & Contant's Accommodation Pipe Company, and one tank containing a small amount of oil was burned. Their loss is oot heary.

During the fire, and under the pressure of the mmense heat or from some other cause, well No. 47 commenced to flow and spouted oil quite ively for a few moments.

The entire loss of oil cannot yery much from ,600 barrels, valued at \$2,700, and the derricks, engine houses, tanks, &c., will probably swell the total loss to about \$10,000.

Montana. A recent article in the Springfield Republica gives some facts and figures about this young and promising Territory. To get to Montana there are several routes in the traveler's choice: One across the plains by way of Laramic; one by way or Great Salt Lake City; one up the Comibla river and across the mountains, and lastly the Missouri river route, which is naturally the favorite. The mines are, of course, the chief attraction. There is but little quartz mining as yet, and probably will not be until the placers give signs of exhaustion. "The gross products it gold for the season have been great; a few have made generous fortunes, and many have done fairly. The luck, like the gold, lies in streaks; while many miners have labored in un and sand all summer, and made scarcely day Fages, two men took out a ton of gold, and rom one bar in Confederate Gutch, fifteen hundred feet by three bundred; one which three ompanies worked during the summer, a millio a half of gold was taken. This Confederate Gulch is regarded as holding the richest gold denosits on the continent

The total product of the Territory this year is estimated by the miners at twenty-live millions of doltars, "which," the Republican adds, "is probably too high." Apart from its minerals, the Territory possesses many extremely fertile valleys, and, it is asserted, fine facilities for grazlug. Gallatin Valley produced this tenson sixt thousand bushels of wheat. The Territory is also fortunate in the possession of one tri-weekl and three weeklies, of a telegraph, a daily stage line to Salt Lake City, and of a new Governor Green Clay Smith, of Kentucky. The population has been, for the most part, transient though this season, it is thought, nearly half of the ontire number will remain through the

The Anderson Oil Company at Petroleum Com tre, have decided to shut down unless they can bring their employees down to a much lower figure on their rates for labor than is now being puld. This company is one of the largest in that section, having in the neighborhood of twenty wells on the McClintock Farm. There are but two producing wells on the Story Farm at pres ent and these are small ones.

CAR BURNED .- About two 'o'clock, on Thurs day afternoon, a caboose car standing near the pa-senger deput, on Monroe street, was struck by another car with such force as to knock over the stove in the caboose. The fire scattered over person being in the car, the fire was not discorered until it had burned through the car in several places. When the slarm was raised, the ca was pushed by hand on to the crossing, and w shoveled-into it. After a short time the are was subdued, but the inside of the ear was entirely destroyed. Had the wind been from a contrary direction, the platform near where the car stood must have taken fire, but fortunately the current was favorable.

POPULAR LECTURES.—The Junior Literary Association have appointed Measis, N. Irwin Shugert, Lanman Chase and R. B. McDannell ns a committee to arrange for a course of public lectures, and several engagements have already been made. Prof. A. B. Hyde, of Allegheny College, will tecture in Corinthian Hall on the even ing of the 8th of January, and Rev. J. J. Murks D. D., of Petroleum Centre, has accepted un in ditation for a subsequet date.

The Junior Association exhibit a proiseworthy nergy in this effort to provide for their own and the nublic's entertainment, and we have no doubt will mout with a gratifying success. Other lecturers will be secured as occasion offers.

The New School House

Millors Horning Herald:
In a few days our new school house will be ready for the scholars. The teachers who have assembled at conventions, and have performed their surprise testimonials will soon settle down to the work for which our citizens are, have been and must necessarily expect to be, so heavily axed. I presume the building itself has been dequately insured in companies of good standing. So much presumed, permit a few enguest-ions from a citizen, whose taxation is so encrous that he feels impelled to express a fervent hope that some good may be attait lay that is annually drained from this city. First, then, is there a mind among the intending teachers, carnest, resolute and determined to instruct guide and develop the capacities of those to trusted to their ch arget I forvently hope there may be, and to that mind I appeal. Hitherto our public school has been a unisance, and when recess was taken, or the scholars dismissed, erowd of noisy, swearing, fighting, screaming, oung lunaties, futher than boys and girls con gregated for improvement, swarmed in the play ground, or rushed through the streets. Cannot our teachers, or the mind that I hopefully appeat to, organize some discipline, by appoint out door monitors, by invisting on modcration, and sternly repressing the rowdy blows fighting and swearing, that instantly bursts forth when school is dismissed, and which repels the gentle mother and anx ous father from realizing he benefits he is taxed for. If a few of the pu pils can be impressed with the fact that educa tion is a privilege, and not a penitentiary crime, and the teachers learn that the outdoor behivior of their pupils is no bid indication of indoor successful teaching, heavy as the school tax may be, it will be cheerfully paid, and the writer will recognize in the late conventions something beyond a mutual admiration society, or flirting

Every year, the public mind rapidly advance its estimate of the value of education; silly chool marms, who mistake pertuess for educational ability, must scat themselves at the sewing machine, and conceited male teachers must off to the dry goods counter, for communities will be satisfied with nothing less than actual, visible results, exemplified by the progress of our hoys and girls, not alone in reading, writing and arithmetic, but in that external Christian gentle ness on the part of the pupil, which is inspired by the example of the teacher and practiced by the pupil, in order to win the respect and approbation of his instructor. To the parents, one word ; imist on regular attendance of your chiland it you value your child's future, lighten the latter of learning, by taking an interest in what he is studying. The school is only a means to teach the real end and intuition of education. You must accertain from the boy or girl, what he or she may be studying; what difficulties impede progress; these, your task it is to remove, your task be heavy, the truest mode of getting its full value back, will be by a gentle, firm and regular supervision of what the teacher is trying effect; and see to it, oh, parent, that your offspring is well taught.

The most sanguine among us can hardly realze the extent and perfection to which education will attain in the next twenty years, and the parent who does not now secure for a child the best education within his reach, by watching teacher as well as child, will deservedly incur the reproach of that child, when in after years the then adult discovers his or her deficiencies So teachers, open school, pupils take your sents, whilst we citizens watch the result and foot th
